

Intellibox is specifically designed for mobile retailing

Uniquely identifies:

Customer's handset and operator and for operator's own customers their phone number, name, price plan etc

Uses this info to provide recycle price, targeted acquisition & retention offers

Electronically reads a customer's identity document to prevent fraud / theft

Sends a SMS to the customer's handset with offer summary

Protected by international patent application PCT/GB2010/000949

Intellibox Store Placement
